

Earned Income

The term **earned income** refers to the money a worker receives from a company for performing a particular job. This includes his or her regular salary along with any commissions, tips, and bonuses. For example, a waitress receives both a paycheck and tips. Together, these are her earned income.

A department in the federal government, called the Internal Revenue Service (IRS), collects taxes from working individuals. These taxes are used to pay for services provided by the federal government. Income tax is calculated as a percentage of an individual's earned income, called tax brackets. The chart below shows the current federal tax brackets. It is broken into two categories: people who file as an individual (single) and those who file jointly (married).

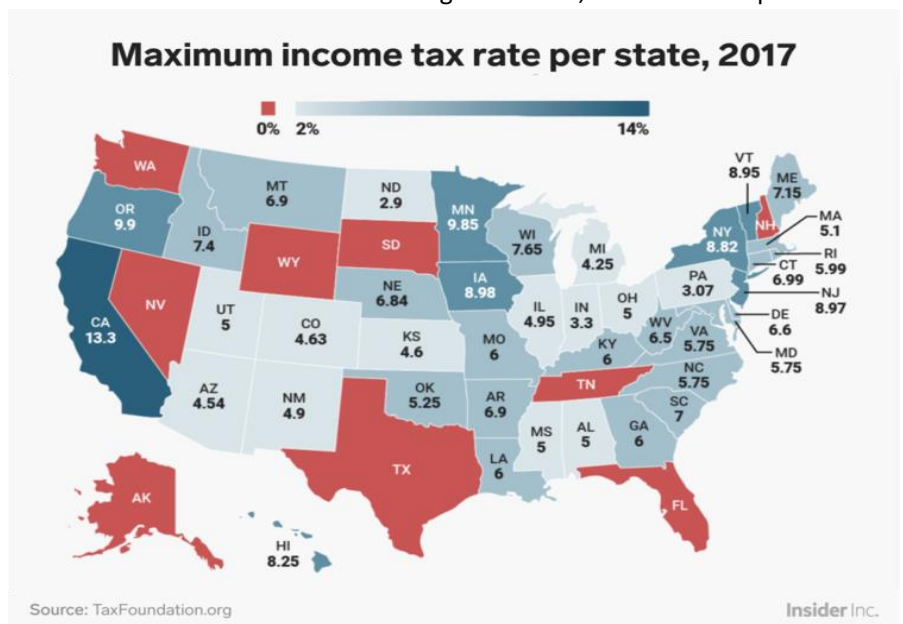

2019 Federal Tax Brackets

Tax Rate	Annual Earned Income	
	Single Filing	Married Filing
10%	\$0 to 9,700	\$0 to \$19,400
12%	\$9,701 to \$39,475	\$19,401 to \$78,950
22%	\$39,476 to \$84,200	\$78,951 to \$168,400
24%	\$84,201 to \$160,725	\$168,401 to \$321,450
32%	\$160,726 to \$204,100	\$321,451 to \$408,200
35%	\$204,101 to \$510,300	\$408,201 to \$612,350
37%	\$510,301 and above	\$612,351 and above

Taxes are regularly deducted from workers' paychecks. Most people are required to annually file income tax returns which is used to calculate whether the right amount of income tax has been withheld from a paycheck throughout the year. The chart below shows how much workers receive from a \$75,000 salary in different cities across the United States.

Besides paying taxes, individuals can use their earned income to add to their savings accounts, retirement plans, or spend it. Remember, it's always important to save some of your money in a safe place, such as a savings account at a bank. Regularly putting small amounts into your savings account can add up quickly!
