POYNT

The Poynt Smart Terminal Is Here
SMART ISN'T JUST FOR PHONES ANYMORE

Your business deserves modern technology. The Poynt Smart Terminal is an all-in-one smart device you'll actually want to have on your counter.

ACCEPTS ALL OF TODAY'S AND TOMORROW'S PAYMENT TYPES, and can easily email receipts, refund transactions, and settle with the tap of a button. And with the free smartphone app*, you can do all this from anywhere. It's like a remote control for you business.

Organize, Optimize and Transact in One Place

Your clients depend on you for the products and services they love. Register lets you optimize your catalog in order to process transactions accurately and efficiently, making your and your client's payment experiences seamless.

THE FLEXIBILITY YOU NEED TO RUN YOUR BUSINESS

- Create a hierarchy of Catalogs, Categories and Products to suit your business's needs
- Easily apply custom taxes, surcharges and discounts, which ensures that you and your staff apply the right charges at the right time
- Manage your inventory with convenient reports, like item-level reporting, which tell you what is and isn't selling
- Process refunds directly from the Register app, preventing the need to jump from app to app

Register comes pre-programmed on all Poynt Terminals; for many customers, it is a tool they cannot live without. Merchants can easily create or modify their catalog on Poynt.net or via the Poynt Smart Terminal.

In a fast paced business like ours, we need a POS system that allows us to streamline our transactions, and Register has done that for us. We were able to customize catalog items, like our famous cheese steak sandwich, with add-ons like premium toppings and options; this helped us to customize orders quickly and never under or over-charge our guests.
