I. OVERVIEW

The Office of the Illinois State Treasurer (“Treasurer”) is issuing this Request for Proposals (“RFP”) to solicit proposals from qualified firms (“Respondents”) to implement a commercially available, customizable, hosted treasury management solution. The treasury management solution shall be a centralized, streamlined, and automated solution that simplifies the data transfer into a single, integrated data set. The Treasurer seeks a solution that provides real-time data analytics, forecasting, and cash positioning with customizable dashboards per user and per function. The Treasurer seeks a Respondent that will provide software and implementation services as well as post-implementation support. A Software-as-a-Service (“SaaS”) solution is desirable. Respondents shall submit their Proposals by 2:00 p.m. CT on March 3, 2021.

II. BACKGROUND

The Treasurer is established under Article V of the Constitution of the State of Illinois of 1970 (“Constitution”). The Treasurer is responsible for receiving and safekeeping all public monies, ensuring liquidity is available to meet the State’s obligations, and investing the remaining funds in appropriate instruments that obtain the best risk-adjusted returns in accordance with applicable law. The Treasurer invests money on behalf of State of Illinois agencies, boards, and commissions (collectively, “State Agencies”).

The Treasurer’s mission is as follows:

The Illinois State Treasurer’s Office is dedicated to protecting the state’s portfolio, ensuring the liquidity of all investments, and consistently producing earnings at or above industry standards. Our investment decisions promote education, access, and opportunity for individuals and governmental bodies across our state to give families the tools to achieve the American Dream. The Treasurer’s Office is committed to fulfilling this mission in a highly professional and ethical manner, while striving for transparency, efficiency, and preservation of public trust.

The Treasurer maintains demand deposit accounts with financial institutions for purposes such as providing a clearing system for various forms of payments (e.g., coins, cash, checks, and electronic fund transfers) made to state agencies, and accepting receipts and disbursing payments made by the Treasurer.

For full details on the Treasurer’s Investment Policies and Programs, please visit the Treasurer’s website at www.illinoistreasurer.gov.

A. Current Treasury Management Systems

Currently the Treasurer employs a custom developed application, modular Treasurer’s Information System (“TIS”) for electronic processing of banking and investment transactions. Developed in Microsoft .NET Framework 4.0 with a COBOL component, and based in a siloed approach to development, TIS is lacking in certain capabilities and the Treasurer seeks to acquire a system that can effectively and efficiently manage business processes in a fully automated manner. Many of the treasury management processes rely heavily on manual input and review as well as tools external to TIS such as MS Excel, MS Access, txt files, pdf files, image files and MS Word documents and forms.

B. Initial Qualifications

Respondent must show how its product(s) and services meet the initial qualifications outlined below otherwise Respondent's proposal will be rejected as non-responsive. The Treasurer may choose to determine initial qualifications by reading the Initial Qualifications & Intent to Propose document alone, so submissions should be sufficiently detailed to clearly demonstrate initial qualifications without reference to any other material.

The following initial qualifications must be met for proposals to be eligible for evaluation:

1. The proposed solution (including third-party solutions) must meet the industry security standards as approved by Treasurer.
2. The Respondent must have been in the treasury management system solutions delivery business for the last ten (10) years providing all services, functions, and subfunctions listed: (a) banking and (b) investments.
3. The proposed solution must have been a successful treasury management software application that has been actively used for the last consecutive eighteen (18) to twenty-four (24) months by a business that has successfully designed, written, and implemented treasury management software for a minimum of ten (10) years.
4. The proposed solution must represent an integrated treasury management system which may include third-party solutions; however, all components must be integrated with the core line of business functionality proposed.
5. The Respondent must have three (3) references of successful implementations, completed within the last five (5) years, of the equivalent treasury management solution being proposed. One of the three (3) references should be a governmental reference. Ideally, one of the three (3) references should be a state governmental entity of a similar or larger size to the Treasurer. An equivalent solution is either the same version of the application or one major version earlier and for the same or greater approximate number of daily transactions, users, financial institutions, broker dealers, investments and money managed.
6. Respondent must provide business continuity, disaster recovery, and contingency plans.

III. SCOPE OF WORK
